DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of Group I, claims 1-6, in the reply filed on 14 July 2006 is acknowledged.

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

The IDS submitted 10 November 2002 and 6 December 2003 have been considered by the Examiner.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by over Seto et al, U.S. Patent 5,200,369.

Seto et al. disclose a composition having overlapping ranges of components with instant claims 1-3 and 6. See Abstract, Paragraphs [0050]-[0062], [0070]-[0072], and [0081]-[0089]. Seto et al. disclose a glass composition having overlapping ranges of properties with instant claim 1. See Paragraphs [0049], [0068], [0073], [0078], [0079], [0107], and [0109]. The compositional and property ranges of Seto et al. are sufficiently specific to anticipate the glass as recited in claims 1-3 and 6. See MPEP 2131.03. Furthermore Example 21 anticipates the compositional and visible light transmittance and total solar energy transmittance of instant claims 1-3 and 6.

Art Unit: 1755

Since the composition of the reference is the same as those claimed herein it follows that the glasses of Seto et al. would inherently possess the properties recited in claims 4 and 5 See MPEP 2112.
